

Versa R2000

Simple, fast recovery of whole systems or individual files

- Data Backup
- Server Imaging
- Continuous Data Protection
- Off-Site Data Backup
- Remote Replication

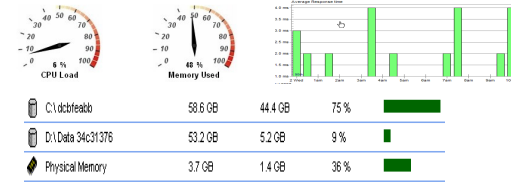

Versa R2000 Recovery Appliance Up to 8 Terabytes of Native Storage & 16 TB Compressed Data Storage

Downtime in today's business environment is money wasted. In fact, an extended downtime can actually doom a small- to medium-sized organization.

The Gartner Group estimates that two out of every five businesses experiencing downtime from a disaster will be out of business in 5 years. Taking backup and disaster recovery seriously is the only real insurance against this possibility.

Versa Remote Monitor is a service that continually monitors the status of you Versa Appliance from a secure remote server. Monitoring is done 24 hours a day and you will be alerted to a failed condition of your Versa Appliance. This is critical to have a reliable data recovery service.

Comprehensive Data Protection Services

Versa Backup

Nightly Digital Backup of your data at blazing gigabit speeds. * Included

Versa Live

Continuous Data Protection for No-Loss Data Restore. As data changes it is replicated to the Versa Appliance. * Included

Versa Imaging

Point in time Images of your key Network Servers and Workstations for immediate disaster recovery with Bare Metal Restore. Simple, fast recovery of whole systems or individual files. * Up to 3 Server Lic Included

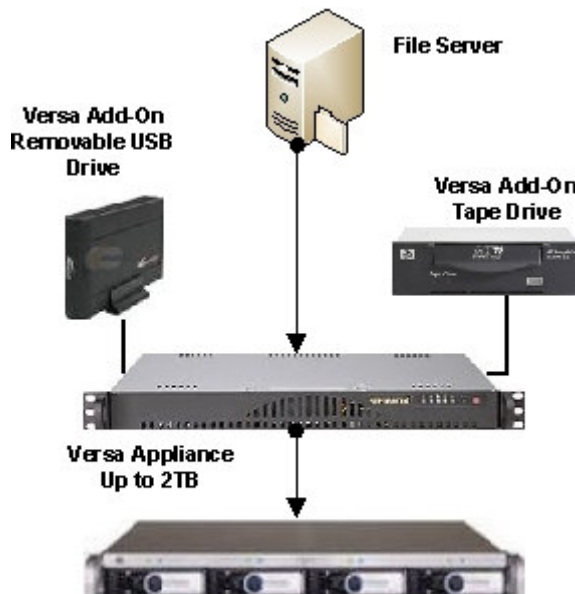

Versa Vault

*Backup critical data to a secure off-site location. Add-On

Versa Replicator

Replicator allows the primary R2000 to replicate to a secondary unit off-site at a Data-center or Remote Office. Add-On
